

HIGH GROUND
— D E F E N S E —

ADVANTAGE 7.62X51 GATLING GUN

DESCRIPTION

The High Ground Defense “Advantage” is a new Gatling gun design and retains commonality to the rotor diameter, barrel spacing, primary bolt cam, and bolts to its predecessor, the M134. The remainder of the system has been completely redesigned to optimize and increase effectiveness, reliability, and lethality.

SPECIFICATIONS

- Absolute rotor lock safety
- Brushless DC servo drive w/high precision control feedback
- Redesigned delinking and transfer mechanism
- Integrated Status, Health, and Usage monitoring
- Integrated remote command and status interface
- Accurate rounds count
- Zero startup torque effect
- Optimized ammo feed system w/multiple feed chute positions
- Self-contained barrel clamp w/integrated muzzle devices
- Variable on Demand firing rate up to 3000 rnds/min
- Weight: 47lbs
- Length: 41in
